

Sanitation

HORTI-KLOR™

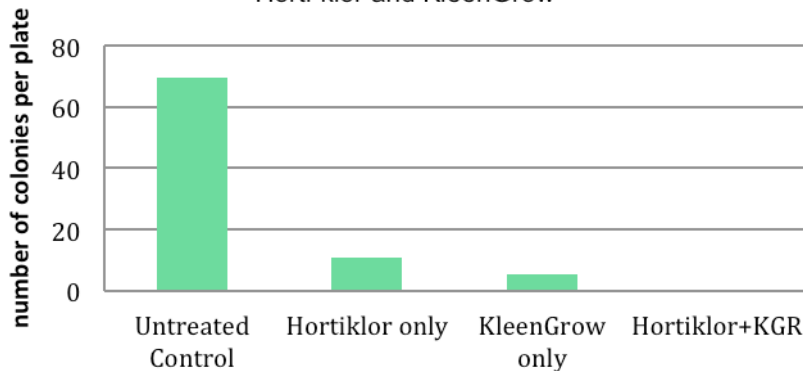

HEAVY-DUTY ALKALINE DETERGENT

HORTI-KLOR™ has been formulated for cleaning and sanitizing throughout the food plant and grower industries. **HORTI-KLOR™** is an active, high-foaming detergent designed to help meet the highest food plant and greenhouse grower sanitation standards.

Effective for Removal of Stubborn Biological Residue.

HORTI-KLOR™ is a composite of detergents and emulsifiers formulated to dislodge stubborn materials such as biofilm build-up, oily biological residues, and dirt. The emulsion will not break during rinsing thus preventing oily biological residues which contribute to bacterial growth and off-odors.

Control of *Thielaviopsis basicola* on a Wood Surface
Horti-klor and KleenGrow

High Foaming Action

HORTI-KLOR™ produces a high foam when used in a foam applicator. Foam can be beneficial due to the residual soaking action on both vertical and horizontal surfaces. This soaking action contributes to thorough cleaning results.

Areas of Use:

Safe and effective to clean storage sheds, packing lines, coolers, trucks, pots, plug trays, ground cover, shade cloth, disposal areas, lunchrooms, washrooms, beds, totes, equipment, etc.

HORTI-KLOR™ is safe to use on stainless steel, aluminum, iron, concrete, poly and glass.
